VoC INFORMATION SYSTEM

A customized information system has been developed to capture VoC results. The theory assessment will be completed on-line by a candidate and the result recorded by the Assessor. The practical assessment result will be recorded by the Assessor.

VoC results and candidate and Assessor details will be available on-line to participating companies.

Implementation and administration of the system will be funded jointly by participating companies.

Participating companies will nominate a person who will be authorised to access/update assessor and worker details.
